

Pioneer Autoists Had Their Trials

STEARNS KNIGHT IS WELL STYLED

THOSE WHO OPERATE CARS TODAY HARDLY CAN REALIZE THE DIFFICULTIES OF 25 OR 30 YEARS AGO

The history of the automobile has progressed to the point where reminiscences of early motorists are valuable and amusing. Almost thirty years have passed since a few brave souls braved the elements in the shape of tin, noisy, "horseless carriages." The first thought after having improved automobiles is that most of the early models of 1900 model cars shows very clearly how rapid has been the evolution that has given us the beautiful, powerful, comfortable and speedy machines of 1928.

Another Phase

But there is another phase of the situation which shows the real pioneer spirit of those first motorists. Consider the difficulties of the early days of the automobile industry. The first automobiles were built by hand, and the materials were of the poorest quality. The first automobiles were built by hand, and the materials were of the poorest quality. The first automobiles were built by hand, and the materials were of the poorest quality.

Today and Yesterday

In the days of early automobiles, the driver had to be a man of many parts. He had to be a mechanic, a driver, and a navigator. He had to be a man of many parts. He had to be a mechanic, a driver, and a navigator. He had to be a man of many parts. He had to be a mechanic, a driver, and a navigator.

Today's Advantages

Now, the driver can sit back and enjoy the ride. The car does the work for him. The car does the work for him. The car does the work for him. The car does the work for him. The car does the work for him.

RUDYARD KIPLING SUGGESTS EPITAPH

Offers "We Have Served Our Day" for Press Memorial

LONDON, Dec. 8.—When Rudyard Kipling was asked to suggest words that might appropriately be placed on a memorial to the journalists of the British Empire who fell in the war, he wrote: "We have served our day."

Toured Europe Years Ago On Bicycle Now in Museum

ATLANTA, Dec. 8.—A story of a man who rode his bicycle all over Europe years ago, and now has the bicycle in a museum.

The Outstanding Chevrolet of Chevrolet History

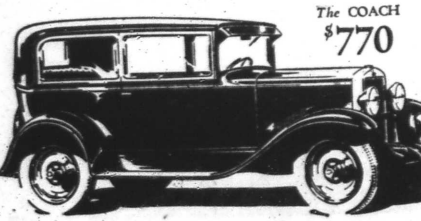

- a Six in the price range of the four!

Since the announcement of the Outstanding Chevrolet of Chevrolet History, thousands of people have already placed their orders for this sensational new car! Never before has any new Chevrolet ever come with such tremendous public acceptance in so short a period of time!

Climbing 16 years of continuous development and improvement... representing the combined technical skill of Chevrolet engineers and the General Motors Research staff... and proved by millions of miles of testing on the General Motors Proving Grounds—

—this sensational automobile has brought within the means of everybody, everywhere an order of beauty, style and performance that has hitherto been available only in cars costing hundreds of dollars more!

The great new six-cylinder valve-in-head motor is an engineering masterpiece. Not only does it develop 32% more power than any previous Chevrolet motor... not only does it offer a sensationally increased speed and faster acceleration... but it provides this amazing performance with an outstanding economy that it delivers an average of better than 20 miles to the gallon of gasoline!

The COACH \$770

low-priced automobile. The heavy dual steel frame is rigidly braced with four cross members to withstand the twisting and turning of rough travel. Four long, semi-elliptic shock absorbers spring up parallel to the frame and equipped with electric lubrication at all the axle joints— cushion the entire upper structure against road shocks. A full ball-bearing steering mechanism, with complete lubrication at all the points of contact, results in delightful ease of control. And, as a bonus, control that is more than equal to the most unusual requirements.

The marvelous new bodies by Fisher are designed for distinctive beauty and style as well as exceptional comfort and safety. Not only are they longer, lower and roomier... not only are they built of reinforced hardwood and steel, the safest and most flexible combination of materials known to the body builders' craft—but they also incorporate one of the greatest advances ever achieved in the development of closed car bodies... the adjustable driver's seat that may be moved forward and back to suit the comfort of the driver! A slender flat-type steering wheel, foot-controlled handgrip dimming device and a completely equipped indirectly lighted instrument panel are further features that add to the comfort and safety and pleasure of driving this great new car.

But no mere recital of engineering advantages, however detailed and complete, can possibly convey any adequate impression of the Outstanding Chevrolet of Chevrolet History. So we say to you—come in. Learn the full and significant story of this greatest of all Chevrolets!

We know that you'll say what thousands of others have said in the last few weeks—"I want you to place my order on your preferred delivery list!"
