RECORD-BREAKING racing cars, speed bosts and airglanes have Valve-in-Head Engines. Engineers
know this type of engine is the most efficient in the world.
What's that got to do with Chervolet! Everything—for
Chevrolet is-powered this same Valve-in-Head way.

Valve-in-Head efficiency means that more power is Valve-in-Head efficiency means that more power is developed from gasoline. Or you can put it this way . . . Chevrolet gives you more miles per gallon of gas, without acrificing the full 85 H.P. performance you need.

For instance, Chevrolet owners find they can take the For instance, Chevrolet owners and they can take the law without effort, get away faster at traffic lights, hold cruising speeds more comfortably. Yet these same owners report 22 to 27 miles and more to the gallon of gas!

Add to this the fact that the Valve-in-Head design cuts down oil consumption to a new "low" — reduces carbon formation—and is famous for dependability. There you have the reasons why a Valve-in-Head Engine is the very best kind for a car that emphasizes low running and

Take a minute to check through all the other fine advantages of the new Chevrolet, as listed to the right. Then come to our showrooms, see and drive it, yourself!
