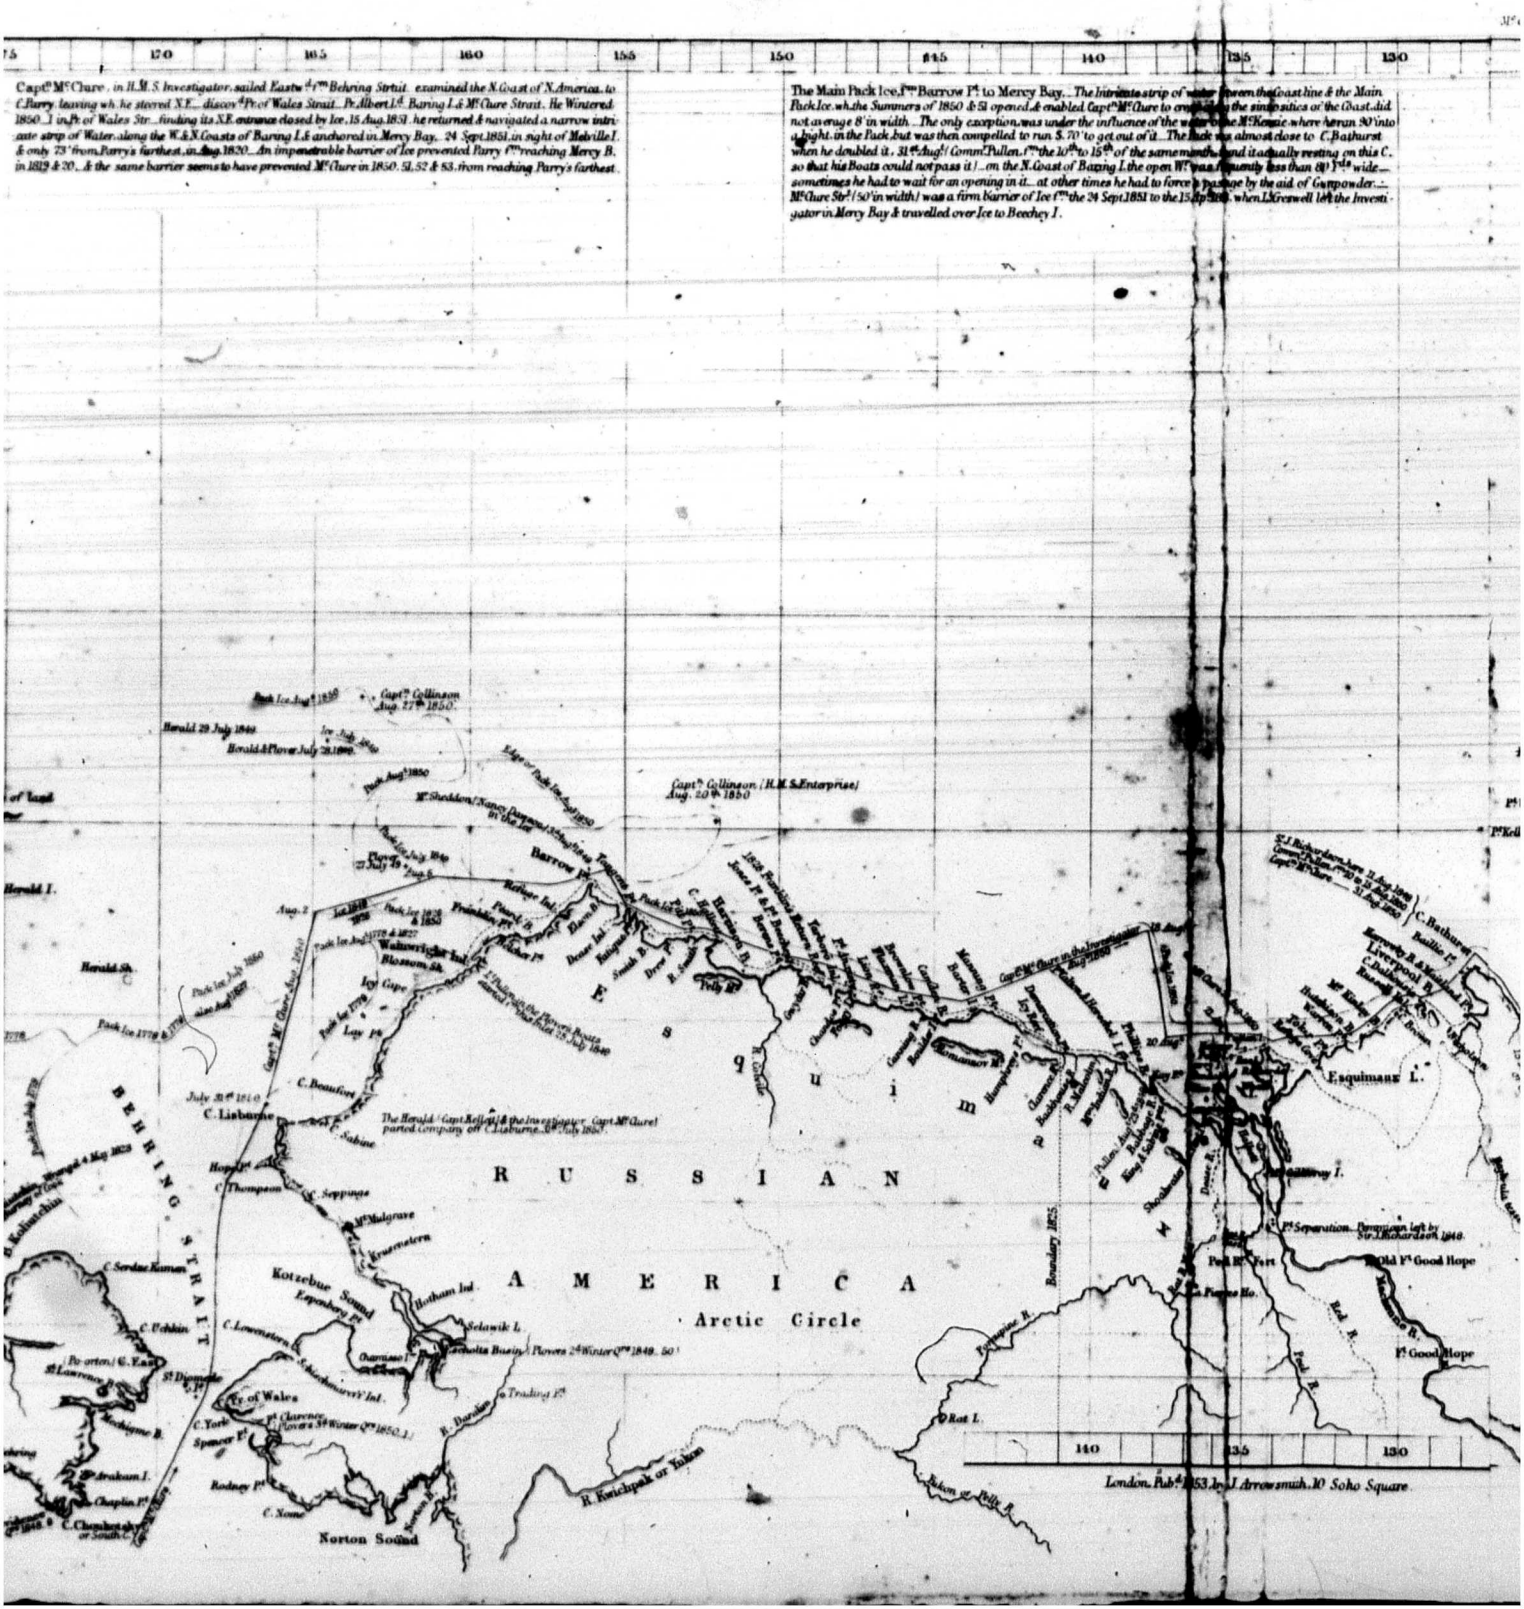
Capt.n M.c Clure , in H.M.S. Investigator, sailed Eastw.d f.m Behring Strait, examined the N. Coast of N. America, to C. Barry, leaving wh. he steered N.E., discov.d Prince of Wales Strait, Pr. Albert L.d, Baring L.d & M.c Clure Strait. He Wintered 1850 ; in Pr. of Wales Str. finding its S.E. entrance closed by Ice, 18 Aug. 1851. he returned & navigated a narrow intricate strip of Water along the W. & N. Coasts of Baring L.d, anchored in Mercy Bay, 24 Sept. 1851, in sight of Melville I. & only 73' from Parry's farthest, in Aug. 1820. An impenetrable barrier of Ice prevented Parry f.m reaching Mercy B. in 1819 & 20. & the same barrier seems to have prevented M.c Clure in 1850. 51. 52 & 53. from reaching Parry's farthest.

The Main Pack Ice, f.m Barrow P.t to Mercy Bay. The intricate strip of water between the Coast line & the Main Pack Ice, wh. the Summers of 1850 & 51 opened, & enabled Capt.n M.c Clure to creep along the sinuosities of the Coast, did not average 8' in width. The only exception, was under the influence of the water of the M.c Kenzie, where herein 30' into a bight, in the Pack, but was then compelled to run S. 70' to get out of it. The Pack was almost close to C. Bathurst when he doubled it. 31.st Aug.t Comm.r Pullen, f.m the 10.th to 15.th of the same month, found it actually resting on this C. so that his Boats could not pass it !.. on the N. Coast of Baring L. the open W. was frequently less than 8) f.t wide.. sometimes he had to wait for an opening in it.. at other times he had to force a passage by the aid of Gunpowder.. M.c Clure 50 f.t (50' in width!) was a firm Barrier of Ice f.m the 24 Sept. 1851 to the 15 Apr. 52. when Lieut. Creswell left the Investigator in Mercy Bay & travelled over Ice to Beechey I.



Capt.n Collinson Aug. 27.th 1850.
